In case of acute disease, regeneration of the intestinal villi requires the nutritional management to last for at least three weeks. Lifetime feeding may be necessary/beneficial in case of chronic disease. To optimise digestion, the recommended daily intake should be divided into several small meals.

For the mixed feeding table please see the end of the section Gastrointestinal Tract. This product may be fed to kittens (feeding tables at the end of the section).

GASTROINTESTINAL DISORDERS

RECOMMENDED FOR CASES OF

- Acute and chronic diarrhoea
- Gastritis
- Inflammatory Bowel Disease (IBD)
- Colitis
- Small intestinal bacterial overgrowth (SIBO)
- Maldigestion/ Malabsorption
- Dysrexia, re-feeding after surgery

NOT RECOMMENDED IN CASE OF

- Lymphangiectasia, exudative enteropathy¹

¹In these cases Gastrointestinal Moderate Calorie would be more appropriate.

DIGESTIVE SUPPORT

A highly digestible formula with balanced fibres, including prebiotics, to support a healthy digestion and transit.

HIGH ENERGY

A high energy content to reduce meal volume and decrease intestinal load.

HIGH PALATABILITY

High palatability to satisfy decreased appetites.

[S/O][®] INDEX This product creates an unfavorable environment to creation of oxalate and struvite uroliths in the urine.
